

## Questions and Answers about the IAWE

**Q.**

**Why another organisation - what is so different about yours?**

**A.**

### **Masters or Followers?**

We regard 'Mastery' as the first stage for everyone instead of the last stage for the few. Real development in terms of self-empowerment continues from the basic realisation of 'Mastery'.

### **A shared Experience which is inclusive.**

We all operate from the same, shared energetic experience, which is available to everyone. Non-therapist or different therapies, the experience is equally available and accessible. A Shiatsu or Reiki practitioner, and a non-therapist, can share in the experience and effects of an Osteopathic or Reflexology treatment. Waveform is all-inclusive; direct experience is all-inclusive.

### **Direct Experience rather than just knowledge and tools**

Waveform works from the position that direct experience is fundamental to development and self-empowerment, and is the basis for effective treatment and greater understanding.

An individual's direct experience creates an environment for growth, creativity and flexibility, which is not dependent on the experience of others, what the 'book' says, or a rigid structure of, 'how it should be done'.

The direct experience of Waveform is a thorough testing ground for all theories and tools, and provides a pathway for the development of individual skills.

### **Research**

Over the last nine years of using Waveform, we have learned a great deal about the working of the energy field. Our breakthrough in 2001, which was recorded in 'Positive Health Magazine', provided an avenue of research, which continues to this day.

We have concrete independent testimony to the effectiveness of therapy which uses Waveform, however we consider the objective evaluation of Waveform and therapy to be of the greatest importance if we are to establish any credibility in the world of science and also mainstream health. This objective proof is

already being obtained through the use of Waveform treatments monitored by scientific means.

### **Why the new association?**

Because we have yet to find one association which incorporates the important points outlined above; and we believe that these are fundamental to any organisation, which proposes to work with energy.

**Q.**

**What are you offering therapists that other Organisations don't?**

**A.**

Our organisation is not just for therapists. Membership of our organisation is open to all who have attended a Waveform workshop, not only therapists of many different disciplines, but business men and women, and those who may not be the slightest bit interested in Therapy, but are interested in working with energy, and the opportunities Waveform has opened up for them in life.

The starting point in our Organisation is 'Mastery', which places all members on an equal level of energetic functioning.

As I have already said; we regard 'Mastery' as the **first** stage for everyone instead of the **last** stage for the few. Real development in terms of self-empowerment continues from the basic self-realisation of 'Mastery'.

Waveform provides each participant with the opportunity and coaching to step into Mastery, how many other organisations realistically provide that foundation and starting point for its members?

And there are other benefits.

**Q.**

**So, what other benefits does your organisation have to offer its members?**

**A.**

### **An International Community**

First of all, and possibly the most important benefit is that Waveform is an international Community. It provides common ground for all people to meet on equal terms, no matter what their race or culture; whether they speak different languages, or are a mother, a businessman, farmer, therapist or student.

They all have one thing in common - Waveform, a shared experience of energy and its manifestations. As we are a multi disciplinary/skilled organisation we provide training and workshops in a number of areas of support.

### **Workshops**

Apart from training in Waveform we provide workshops in **Nutrition** and **Communication, Business and Marketing skills**; as we consider these to be of value not only to the hands-on-therapist, but to anyone interested in their own health and their relationships with other people, whether family or business.

### **Specialist workshops (Pathfinder)**

As Waveform reveals the individual skills of each person, we provide specialist workshops to **enable graduate members to extend their energy skills and experience other ways of using them in life, as well as in work**. This we believe allows the individual to make choices as to where and how they want to use their skills most effectively, which may be in a different field to where they are presently working. These workshops provide opportunities for greater choice for our members. Our Pathfinder workshop with Erics Berger in November was fully booked and a tremendous success; and the one scheduled for June 2006 with Joy Foubister and Mary Tulloch, who were my teachers in Orkney was fully booked two days after the workshop was announced. Brilliant Teachers, great workshops!

### **Communication and Support**

After the 1<sup>st</sup> January we will continue to provide **Enews** for our members however **course information** only will be provided by Enews **for enquirers** in future.

For Waveform Association members; Enews will contain up to date information on any aspect that affects, or may affect the lives of our members, whilst providing information of interest; and generally keeping them informed of what is happening in their international community.

We will also provide a **Newsletter** four times a year (more of this later).

We (the team) will be available by **email**, and at certain times by **phone** to provide **support and advice** to members.

All other relevant information for members will be provided on the **letters page** of the **website** in the **members section**.

## Training

As our organisation is multi-disciplinary, with a large number of specialists in different fields; members will have the opportunity to train in a range of disciplines, which now include waveform.

**Qualified Specialist Teachers**, who have adapted their discipline to include the benefits of Waveform, are being invited to form subgroups within the organisation, providing a resource for others in that particular discipline, and also **a structured training for members leading to qualification**. By the end of 2006 we intend to have training available in:

**Shiatsu** (Full training course commencing September 2006, UK and abroad)

**Reflexology**

**Reiki**

**Healing** (available now)

**Acupuncture** (with Professor Wenbo Xu in Scotland– end of 2006)

**Controlled Remote Viewing** (Training with Angela Thompson Smith, Scotland April 2006).

**Q.**

**How does 'Remote Viewing' come into this?**

**A.**

I (Mike) have always been interested in **Remote Viewing**, as descriptions of what it could do, matched my belief and experience through Waveform: that the mind is capable of many things, and is unimpeded by space or distance and even time.

Two years ago we contacted Angela Thompson Smith who had provided a workshop on Remote Viewing at 'The Field' Conference in London in 2003, which I attended, and asked her if she would be prepared to travel from the USA to run a workshop on Remote Viewing in the UK. We were delighted when Angela agreed to come over from Nevada to run a workshop for us in Scotland and last year we organised a **Controlled Remote Viewing course in Scotland**, which was fully subscribed and was a brilliant success.

**We are now the Organisers for the UK branch of the Nevada Remote Viewing Group**, and wish to give our members the opportunity to share in the amazing experience of Remote Viewing, and to develop these skills under Angela's tutelage, as some of us already have.

## **Research**

In order to continuously improve the quality and efficacy of Waveform treatments, Waveform Energetics is collating objectively, electronically obtained and recorded medical data, during treatments from a range of clients with different medical conditions. This information will be available to our members before anyone else, and will be used to improve the effectiveness of our skills.

## **Insurance**

We are negotiating insurance cover via a block scheme for our therapists and anyone who uses Waveform in their work other than for observation and information.

**This is for multi therapy cover plus Waveform.** It is a very good package; and will cover the member to work anywhere in the UK for Medical Malpractice, Professional Indemnity, Public Liability, Products Liability and a Legal Expenses Package including Inland Revenue Investigation, Legal Advice, Criminal Proceedings etc.. however we are in the process of negotiating an even better package for our members, and expect to have this information available for our members shortly.

## **Waveform listing**

We offer a '[waveform listing](#)' on our site to all our [graduate members](#) regardless of business or therapy; however although we are not purist, we reserve the right to refuse those businesses or occupations we consider not to be appropriate for listing on our site.

Listing is by request, as some of our graduate members may wish to retain their privacy.

## **Discounts**

For graduates there are discounts for participation on the short courses and workshops we provide; and for those that wish a refresher of the basic course, which has continued to develop over the years, there is a 50% discount.

It won't take much to work out that this is a cost effective way of recouping their membership fees.

**Q.**

**Why discounts for graduates and not the students?**

**A.**

Because we wish to encourage the students to complete their

basic training in Waveform and reap the full benefits available to them as a result of this.

**Q.**

**Ok! What does the Waveform newsletter offer its readers?**

**A.**

We are lucky in that we have a wide range of occupations and skills within our waveform ranks; this has provided us with a wealth of information and expertise from around the world. Our Newsletter will initially contain the following, and we will adjust this as the needs and interests of our members become known to us.

News from Waveform groups around the world

Understanding specific medical problems

Case histories

Articles

Nutritional information

Waveform information/updates

Individual portraits and interviews

Course reports

Letters page

The latest news (whatever that may be)

Research information

New members and graduates

Editorial

Our newsletter will also include space for some advertising from our members.

**Q.**

**If your organisation is 'International' will your newsletter be translated into different languages, and what about your website which is in English?**

**A.**

Anyone accessing our website has a choice of English or German languages. Although almost all of our 'members' do speak English, more than a quarter of them are Swiss and we now have a group starting in Germany. We are making arrangements to have the main points of each newsletter translated into German for those that require this and, as our organisation grows we will consider translations into other languages.

**Q.**  
**Ok, the big one - how much does it cost to join your Association?**

**A.**  
£70 for everyone whether Teacher, Graduate or student.

**Q.**  
**How does this compare to the cost of joining other Organisation?**

**A.**  
I have been a member of a number of organisations in my lifetime and have had a chance to weigh up what I feel provides value for money. I have also done my homework, consulted with my International colleagues who are from a range of Occupations and Therapies, and we agree that £70 (less than £6 per month) constitutes a small investment, considering the range and quality of support, workshops and information that is available to them.

**Q.**  
**But aren't there Organisations out there that are cheaper than yours to join?**

**A.**  
Yes, and there are those that are far more expensive. My experience of both is that, if it doesn't support its members, doesn't deliver what it promises, and communication is poor, it doesn't matter what it costs, it is still not value for money.

**Q.**  
**Is that your experience of Organisations?**

**A.**  
It is my experience of **some** of the organisations I have been involved with over the years, and I have learned a lot from this. I have also consulted closely with my colleagues throughout the process of setting up this Organisation so that, with the finances available through membership, we can provide for our members, the best Organisation that we possibly can.

**Q.**

**Are all these workshop and training courses in the UK, and if so, how are your African members going to benefit from them?**

**A.**

Our experience is that people will make an effort to travel large distances to courses and workshops, which they consider to be of value to them. Our courses in the UK have attracted participants, who have travelled from many different countries to attend them; people from Canada, France, Switzerland, Spain, Germany and Malawi for example.

However we will produce the workshops that we have promised, wherever our members want them.

You mentioned Africa.

We were providing Waveform workshops in Malawi earlier this year, and our Malawian representatives have already discussed with us a programme, which includes many of these extra workshops for our next visit in 2006.

We also have some very able translators in a wide range of languages within our team, so wherever we travel, language differences aren't a problem.

**Q.**

**Are prospective members expected to be exclusive to your Organisation?**

**A.**

Not at all, we believe in freedom of choice, and the right of everyone to choose what works for them.

**Q.**

**What would you say that Waveform has contributed to the lives of participants?**

**A.**

It started with a single profound realisation, which took place in a fraction of a second, to a shared experience for many people in ten different countries and from all walks of life.

It has provided a direct experience, which cuts through theory and formula to the source of energetic change, making therapy and treatment direct, simple, straightforward and effective.

It has provided a means of communication on a subtle level, leading to improved understanding of relationships in life, and in business.

It has created awareness of feelings and emotions, which transcend space and time.

It has provided a means of self-empowerment, enabling 'Mastery'.

It has opened up the Magician in all of us, demonstrating the oneness of all things, and has provided common ground, which knows not differences in race, religion, language, gender or age.

It has provided sameness/common ground, a shared experience, which has created bridges and lasting friendships across many continents between people of different races and cultures.

It has enabled perception of another dimension of life, and a realisation that the present holds for us a magic that was always there, just waiting to be rediscovered.

**Q.**

**What is your vision for the future of your Organisation?**

**A.**

Our vision is two fold:

We, (Stella and Mike) are looking forward to continuing to have, a lively, vibrant network of people making positive changes throughout the world. An organisation which continues to seek to develop and extend the boundaries of awareness and knowledge, that is shared through the means that we have.

For our Members.

That they find within the Association and in themselves the inspiration and motivation to continue to develop their Mastery for themselves, and also the lives of those they touch.
